

USDA-CSREES 2007 National Water Quality Conference

[Water Testing and Beyond](#)

The University of Georgia College of Agriculture and Environmental Sciences and College of Family and Consumer Sciences work together to create tools to help Georgia well owners protect the quality of their water. The "Water Testing and Beyond" initiative and exhibit promotes well water testing, provides household water quality circulars, an interactive website for troubleshooting water problems, a training video for private well owners, and encourages technical consultation with your local County Extension Agent.
