

Indiana - Staff assessment of test methods
End of Training

Please rank the test methods from 1-4 relating to the ease of training and volunteers' use of the various testing methods, with 1 next to the method that is easiest to train volunteers, for volunteers to learn, or in which volunteers have the most confidence.

	Coliscan® Easy Gel method (not incubated)	Coliscan® Easy Gel method (incubated)	3M™ Petrifilm™ method	Coliscan® MF method
Ease in training				
Ease for volunteers to learn				
Level of Volunteers' confidence in using				

Please identify any difficulties you faced while training volunteers in the use of each method and overall.
